

AI agents turn regulation into action.

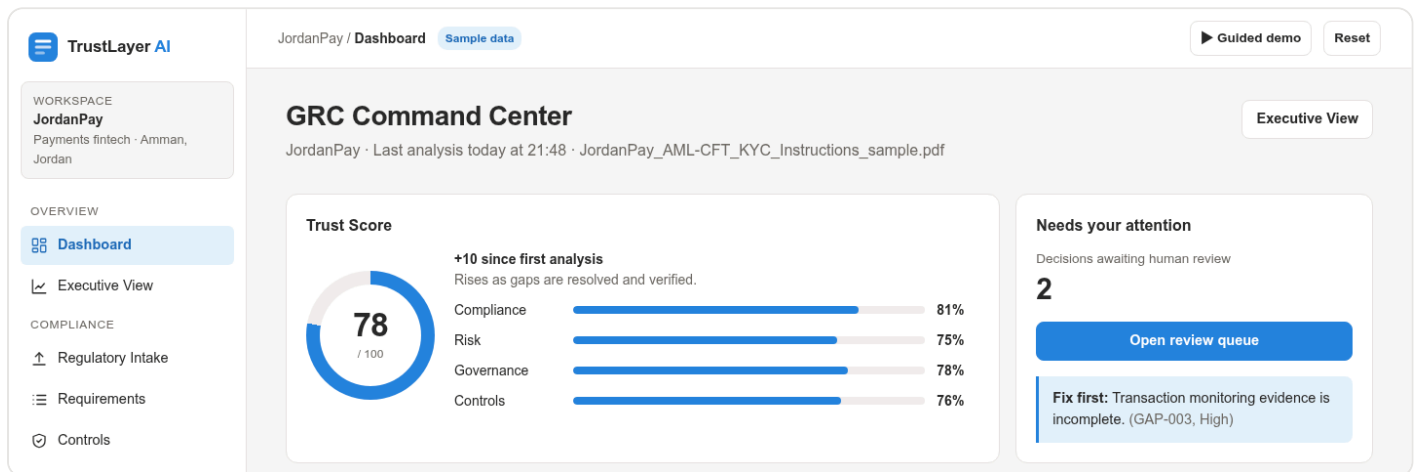

Humans stay in charge of the decisions that matter.

THE PROBLEM

Fintechs and banks receive hundreds of pages of regulation. Compliance teams spend weeks mapping rules to controls and evidence by hand, often in spreadsheets. Gaps surface during audits, when they are already costly.

THE SOLUTION

Specialized AI agents turn a regulation into traceable requirements, controls, risks, gaps and actions. Every decision is structured and carries a confidence score. Uncertain or high-impact decisions go to a human. Everything is auditable.

Clickable prototype with sample data for a fictional fintech: huda007-max.github.io/trustlayer-ai

WHY IT'S DIFFERENT

- Covers the full chain from regulation to action, not just transaction alerts
- Typed AI decisions with confidence scores and human-in-the-loop routing
- Every requirement traced to its source page and section
- Regulatory packs, starting with Jordan; Arabic-English capability

CUSTOMERS

Fintechs, payment and e-money companies, digital lenders, banks and compliance consultants.

BUSINESS MODEL

B2B SaaS subscription plus regulatory packs per jurisdiction. Never touches customer funds.

STATUS

MVP spec, agent architecture and clickable prototype complete. Pre-revenue. Customer discovery starting October 2026.

ROADMAP

Jordan pilots → MENA packs → US pack → global.

TEAM

- **Huda Ahmad**, Founder & CEO (Product & Operations): 15+ years in operations and documentation with USAID projects, World Bank projects, MSF and DCO; Arabic-English translator
- **Omar Nofal**, Co-Founder (Business & Customer Experience): sales and retail background; GRC training
- **CTO / AI Engineer**: recruiting

THE ASK

- **Technical co-founder**
- **Design-partner pilots**
- **Pre-seed funding**
